

HACKXTREME'26

GREEN SOFT TECHNOLOGY, INC.

Domain hosting details On searching many suspicious websites on who is, their hosting appears to be on cloud flare, but after sending mail to cloud flare, they say that the said website uses one of their services like SSL certificate etc. and they do not have the hosting of the website, due to which correct information about the suspicious website cannot be obtained. **Challenges:** Correct information from suspicious websites is not available. **Expected Solution:** A mechanism should be developed that can provide accurate information about suspicious websites along with their actual hosting.
